Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. New claims 79-105 are presented for examination.
2. The following is a quotation of the first paragraph of 35 U.S.C. § 112:
The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is objected to under 35 U.S.C. § 112, first paragraph, as failing to provide an adequate written description of the invention and failing to adequately teach how to make and use the invention, i.e. failing to provide an enabling disclosure.

Applicant did not teach the details of the receiving step of claims 79 and 91 and corresponding medium claims of 95 and 102. Claims 79 and 95 recite receiving an input signal from a network, the input signal comprising an embedded force feedback command. Examiner cannot find enabling support for this language in the specification. Specification taught a server and a client and the client downloading a web page from the server wherein the web page included force-enabling code. Examiner cannot find any relationship of downloading the page to the input signal. Input signal means you input some signal to something else. In these claims there is nothing to input the input signal. It would take undue experimentation for one of ordinary skill in the art to determine the details of this feature as claimed. Also, Examiner is unable to find enabling support for the receiving step for claims 91 and 102. Examiner cannot find support in the specification for the claimed "manipulandum" in claim 82, 84, and 96. Moreover, Examiner cannot find support in the specification for "overriding the first force

feedback command with a second force feedback command" as claimed in claims 86, 97 and other features related to this first and second force feedback commands, e.g., see "generic force feedback command" in claims 88, 99 and "...generating ...associated with the second force feedback command" in claims 89 and 100. Thus, it would take further undue experimentation for one of ordinary skill in the art to determine the details of this feature as claimed.

The examiner contends that it would require multiple undue experimentations for one of ordinary skill in the networking art to make and use the claimed invention for the reasons set forth hereinabove. Applicant is reminded that no new matter is allowed in the amendment to the specification under 35 U.S.C. 132 and 37 CFR 1.118(a).

3. Claims 79-102 are rejected under 35 U.S.C. § 112, first paragraph, for the reasons set forth in the objection to the specification.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mehmet Geckil whose telephone number is (703) 305-9676. The examiner can normally be reached on Monday through Friday from 6:30 A.M. to 3:00 P.M..
